

CoPOS

Cashier Guide

Recording a sale is the most interactive menu of CoPOS. When recording a sale, type **?** in any field to display useful tips.

Type **0** at the main menu to record a sale.

Keywords

Keywords allow easy item lookup using common words. The item, "Apple, Braeburn" may have "braeburn" as a keyword. Coffee bags or plastic tubs for sale may have keywords "cb" and "pt," respectively. The item "Eggs, Local Organic" may have an "egglo" keyword. Items can have multiple keywords. Item keywords are defined in the menu option 4.1) Database > Item.

Hotlist

The hotlist makes quick-changing products easy to ring. Hotlists are often used for the produce department where availability is seasonal. For example, in one year a store may carry 20 varieties of oranges. Instead of changing the product description for a new orange, or deactivating oranges that are not available, available oranges are placed on the hotlist. Hotlists help preserve accurate sales history.

Hotlists and keywords can be combined e.g. =fuji or =shiitake.

For Members

- F7** - Go to member field
- ####** - Member number
- last** - Search for last name
- ,first** - Search for first name
- *N** - New member
- .E** - Show/edit member
- .D** - Remove member from sale
- empty** - Non-member sale

For Customers

- *C** - New non-member customer
- C/name** - Non-member customer search

With a Gift Card

- G/####** - Use gift card number
- F4** - Purchase/recharge Gift Card

Extras

- .R** - Print receipt for last transaction

LPQ12 - Small Shelf Tag - 1.25" x 1.25: 1900/roll - 3 rolls/case

Call support (1-855-772-6767) for receipt paper inquiries

Backups

Backup every night after store close. All lanes and weigh stations should be logged off. Next, insert a USB storage device. From the Controller, choose 2 for Backup, then 1 for Backup Now. Performing a backup will shut down CoPOS. Choose Backup to begin backing up. When finished, the backup will be copied to an available USB storage device. **DO NOT PERFORM A BACKUP WHILE YOUR STORE IS UP AND RUNNING.**

Basic Troubleshooting

Blank Screen

Type **CTRL-C** for username prompt. Type **on** to log in.

Cash Drawer Will Not Open or Register Session Will Not Start

Check that the receipt printer is on and filled with paper. Power the receipt printer off and on.

Blank Screen, No Login, or Keyboard Not Working

Power off the terminal box and reattach the keyboard. Power on the terminal box. Since the keyboard is plugged into the scanner, a broken scanner may stop the keyboard from working. Test for a broken scanner by attaching the keyboard directly to the terminal box.

Scale Not at 0 When Empty

Press and hold the reset button on the scale display.

Exited to DOS (C:\POS>)

Type **copolos** and press enter to return to CoPOS.

Frozen Register Screen

Type **CTRL-C** to put the sale on hold. Type **.s** in the member field to recall the sale. If this doesn't work, power the terminal box off and on. Press the **Print Screen** key to restore the screen.

File Export and Import Not Working

Remove all USB storage devices and insert again.

If you continue to have problems, contact CoPOS.

Upgrade

From the Controller, choose 4 for Upgrade, then 1 for Upgrade CoPOS. Performing an upgrade will shut down CoPOS. Choose Upgrade to begin the upgrade. If a USB storage device is plugged into the server, CoPOS will automatically attempt to download a COA.LZH file saved on the device. If a USB storage device is NOT plugged into the server, CoPOS will attempt to upgrade by downloading the latest version from the CoPOS Cloud. This is only possible if the Internet is available.

F10 Help

If at any point you are unsure how an option works, or would like helpful tips, press F10. Pressing the F10 key within any screen brings up directions on how to use the option you're in and tips to make it easier. Help screens can also be easily printed. F10 help may be updated with each release. This tool is especially helpful for those new to CoPOS.
